

XRDogverse

XRPL Metaverse Project

WHITEPAPER 13.09.2022

XRDogverse

MEME COIN

The *meme* term was coined by Richard Dawkins, an evolutionary biologist. The term *meme* was said by him to be an idea or behaviour style that spreads from one person to another, carrying symbolic meaning.

Memes started becoming mainstream since the advent of the Internet, as they often had the ability to become 'viral.'

In December 2013, the first meme coin on the Ethereum blockchain was released. The founders launched DogeCoin as a joke. It has become a worldwide phenomenon, known only 2nd to Bitcoin in the crypto space.

XRPL has allowed the creation of meme coin on the blockchain. The team behind XRDogverse have created 23 different meme coins. All of which, will be used to create XRDogverse ecosystem.

XRPL

Many are confused between XRP and Ripple. Ripple is the company that is behind XRP, the cryptocurrency. The XRP ledger is referred to as XRPL.

Although it is going through an SEC lawsuit at the moment, it is believed that once this is settled, many companies will be given the 'all clear' to invest.

XRP has many central banks behind it, and every day it seems a new bank has joined. There is a long term vision Ripple is trying to achieve. The roadmap for this is called ISO 2022.

XRDogverse

One of the biggest advantages that XRP has in comparison to its competitors is not just the speed of its transfer, giving the RippleNet the ability to commit transactions around the world instantaneously and with ease, but also, its low gas fees. Unlike with its competition, there are hardly any. 'Gas' refers to the fee required to conduct a transaction successfully.

ECOSYSTEM

This is a metaverse project built on the XRPL.

This token has been black holed (master key disabled).

XR Dogverse has a limited supply of 21 million tokens.

We believe that this project will thrive due to the expanding of the XRP community, meme token fans and the meta verse, which is estimated to become a trillion dollar industry. Also the ISO 20022 protocol when implemented will cause tokens on the XRPL to become the standard.

TOKEN DISTRIBUTION

Name: XR Dogverse

Blockchain: XRPL

Supply: 21 Million

Black holed: Yes

Fixed supply: Yes

Transaction time: 3 seconds

Transaction cost: 0.000013 xrp

Exchange: Sologenics

Marketing and development: 80%

Original team: 20%

XR Dogverse

BLACK HOLE

To ensure transparency the accounts have been black holed. What this means is that the supply is fixed and no one, not even the creators of the coin are able to access the account. We hope that by the account being black holed, this will create transparency for token holders.

Currency: XR Dogverse	Currency (HEX-Code): 5852446F6776657273650000 0000000000000000
Supply: 21000000	Supply fixed: <input checked="" type="checkbox"/>
KYC: <input checked="" type="checkbox"/>	Provided by: XUMM

HOW TO PURCHASE

1. Setup your XUMM wallet.
2. Add our trust line and connect your XUMM wallet.
3. In your XUMM wallet select XR Dogverse token.
4. Exchange how much XRP you would like to use to buy XR Dogverse meme token.

XRDogverse

23 CHARACTERS

The following are the meme tokens in the ecosystem. Each token was the first of its kind on the XRPL (can be verified via time stamp).

XRShibaInu: inspired by Shiba Inu

XRPL

The XRP Ledger (XRPL) is a decentralised, public blockchain led by a global developer community. It's fast, energy efficient, and reliable.

According to experts 99%+ blockchains will not survive. Due to its institutional backing and the ISO 20022 roadmap, XRPL will survive and so will the projects built on top of XRPL.

This includes meme coins built on top of the XRPL.

XRDOGVERSE

The reason why crypto investors often buy meme coins is not for utility, but to be part of a community or for entertainment value.

Our team has created 23 meme tokens all of which are the first of its kind on the XRPL (which can be confirmed via time stamp).

We are building our own ecosystem which will translate into the metaverse for the XRPL, the XRDogverse

XRDogverse

XDOGVERSE

XDogverse will be part of the XRDogverse metaverse. The XDogverse crypto game will be based on the characters from XRDogverse. The X tokens will be used for currency in the game. 23 different tokens for 23 different characters.

We have all the XTokens for the 23 characters in the ecosystem. www.xdogverse.com (coming soon).

XRPDOGVERSE

XRPDogverse will be part of the XRDogverse metaverse. The 23 metaverse pets will be based on the characters from XRDogverse. The XRP tokens will be used to purchase Pets.

The XRPDogverse project will be similar to crypto kitties on the ethereum blockchain.

We have all the XRPTokens for the 23 characters in the ecosystem. www.xrpdogverse.com (coming soon).

XRDOGVERSENFT

NFTs built on the XRP ledger for 23 different characters all based on the XRDogverse metaverse. www.xrdogversenft.com (coming soon).

We have all the Sologenic profiles for the 23 characters in the ecosystem

NEW TEAM

The original team are well aware of the fact, that to achieve their long term vision they need to bring in experts. Which will be done by the sales of tokens from the XRDogverse ecosystem.
