# ABOUT US

The account has been black holed. This means a limited supply and the creators of the coin have no access to the account.

Supply is 21, 000, 000 tokens.

Like Satoshi, the creators behind XRDogverse want to remain anonymous.

XRDogverse was created as a central hub, where all these communities will be able to interact.

# HODL MEMES

The *meme* term was coined by Richard Dawkins, an evolutionary biologist. The term *meme* was said by him to be an idea or behaviour style that spreads from one person to another, carrying symbolic meaning. This was in 1976. Memes started becoming mainstream since the advent of the Internet, as they often had the ability to become 'viral.'

In December 2013, the first meme coin on the Ethereum blockchain was released. The founders launched DogeCoin as a joke. It has become a worldwide phenomenon, known only 2nd to Bitcoin in the crypto space.

There have been many coins that have emulated DogeCoin, and in fact had success in their own right. Many of these coins are based on dogs. According to statistics there are 370 million pet owners in the world.

XRDoge was the first meme coin to be created on the XRP ledger. It was a play on DogeCoin. It was hoped that fans of DogeCoin would also be interested in XRDoge. This was a smart assumption, and XRDoge is becoming a phenomenon in its own right.

The team were inspired by XRDoge and created tokens of the most famous meme coins in the planet .Because the latter was done by a single team we are able to create a central hub where all communities can intersect.

... This is XRDogverse.

# XRPL

Many are confused between XRP and Ripple. Ripple is the company that is behind XRP, the cryptocurrency. The XRP ledger is referred to as XRPL.

Although it is going through an SEC lawsuit at the moment, it is believed that once this is settled, many companies will be given the 'all clear' to invest.

XRP has many central banks behind it, and every day it seems a new bank has joined. Which is why there are many in the XRP community who believe that with the connections Ripple has it will become the world currency.

One of the biggest advantages that XRP has in comparison to its competitors is not just the speed of its transfer, making the RippleNet have the ability to commit transactions around the world instantaneously and with ease, but also, its low gas fees. Unlike with its competition, there are hardly any. 'Gas' refers to the fee required to conduct a transaction successfully.

This will come in handy in the future as NFTs become more acceptable, and people realise that, compared to its competitors, XRPL is a thousand times faster and cheaper.

# NFT VISION

NFT stands for ‘Non-fungible token’, which basically means it can’t be replaced with something else. It is unique. A fungible item could be a dollar bill used by anyone.

The best way to describe NFTs is to think of a painting of the *Mona Lisa* in the Louvre Museum and a *Mona Lisa* bought in an airport.

Both are the same picture. However, one is a hundred million dollars and the other is worth less than 10 dollars.

The reason why the *Mona Lisa* in the Louvre Museum is worth more is because it is the original, one-of-a-kind *Mona Lisa*. It has a backstory behind it. It can be authenticated. It was actually painted by Leonardo da Vinci.

Up to a certain while ago, graphic designers could not do the same for their own projects. That was before the creation of the blockchain.

The blockchain allows time stamps and authenticity to come into play, and can be seen by everyone, what is the original and what is not.

When people think of NFTs they think of still pictures. This is because of the success of projects such as *Punks* and *Crypto Kitties*. But NFTs can be made into:

- Images (both still and animated).
- Comic books.
- Music.
- Short films.
- Game items.

# BLACK HOLE ACCOUNT

There are many reasons for the success of Bitcoin:

- It was the first.
- Fixed amount.
- Code cannot be changed, even if Satoshi himself wants to change it,
- Public ledger.

XRPL allows tokens to do something similar. This process is called 'blackhole', and what it means is that the token supply is fixed and no one, not even the token creator, has access to the account.

We hope that by the account being blackholed, this will create the ultimate transparency. After all, it means that the team is in the same position as everyone else, simply members of the community.

<b>Currency:</b> XRDogverse	<b>Currency (HEX-Code):</b> 5852446F6776657273650000 0000000000000000
--------------------------------	---

<b>Supply:</b> 21000000	<b>Supply fixed:</b>

<b>KYC:</b> 	<b>Provided by:</b> XUMM
-----------------	-----------------------------

<b>Trustlines:</b> 651	<b>DEX Offers:</b> 1
---------------------------	-------------------------

# HOW TO PURCHASE

Download [XUMM Wallet](#).

Deposit XRP into your new XUMM Wallet to Activate.

Set up trustline.

<https://xumm.community/>

Issuer Account	Issuer KYC	Accountname	Token Currency Code	Total issued value of this token
rnFa6NzjHSWVFgSFKQmvzb61V4avR-jLGk7		<b>XRDogverse</b> 	<b>XRDogverse</b>	21000000

Connect your XUMM Wallet to Approve.

Go to [sologenic DEX](#).

Connect Wallet, Choose XUMM and Sign Transaction.

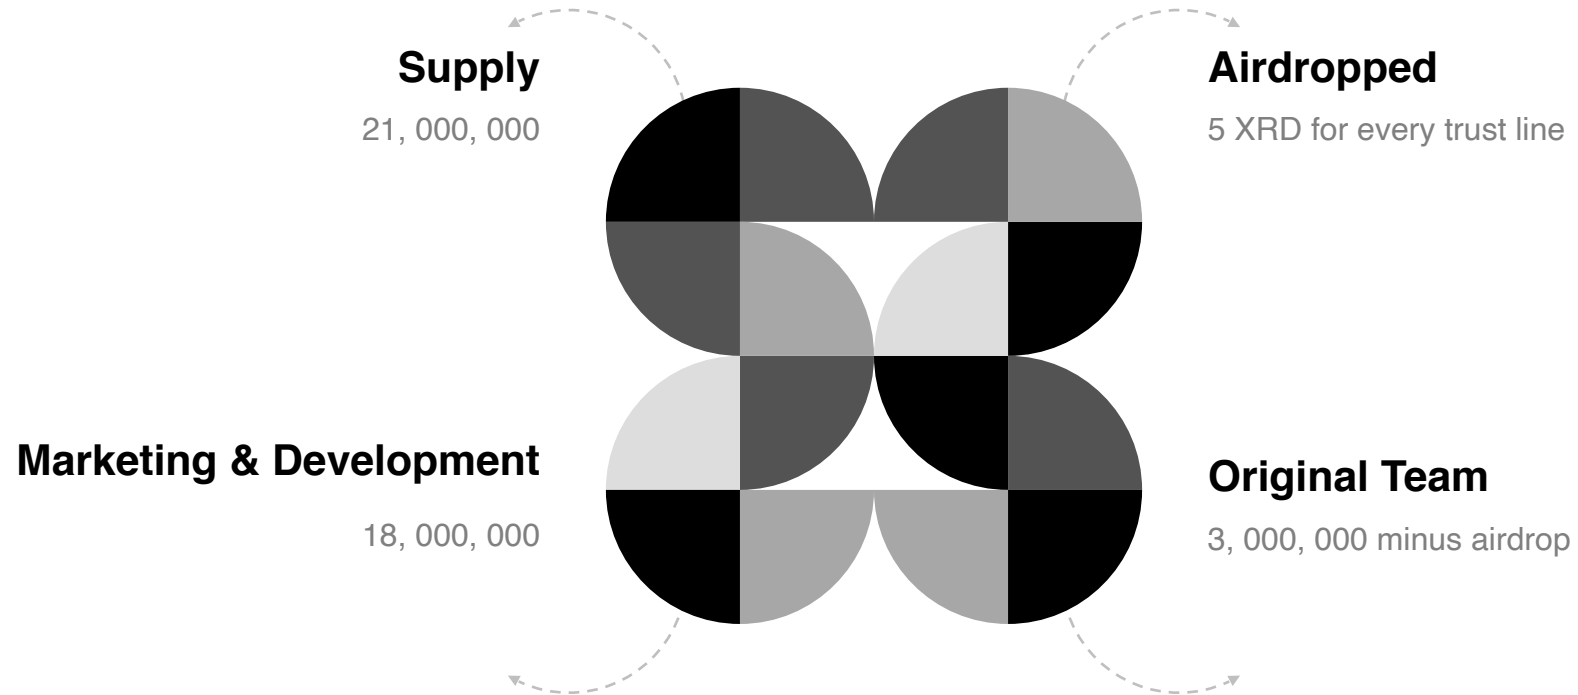

Switch to XRP/XRDogverse.

Sign Transaction.

Acquire XRDogverse.

# TOKENOMICS

# TOKEN DISTRIBUTION

Airdrop

*5 XRDogverse for every trust line*

Marketing &  
Development

*18, 000, 000 XRDogverse*

Original Team

*3, 000, 000 XRDogverse  
(minus what is given in airdrop)*

# ROADMAP

## PHASE 1

- Become KYC Compliant

## PHASE 2

- Intersect all the tokens together into a a community that can communicate with each other
- Create [www.xrdogverse.com](http://www.xrdogverse.com)
- Create @XRDogverse
- Launch XRDogverse token

## PHASE 3

- Black hole the account for all tokens
- Create a logo for all tokens
- Do an airdrop of tokens
- Complete roadmap for all XR tokens
- Create a website for all XR tokens
- Host the website for all XR tokens

A large, stylized, black and white graphic of the letter 'S' is positioned on the left side of the slide. It is thick and blocky, with a white outline and a black fill.

# STRENGTH

- Time
  - Time is on our side, because of the time stamp nature of XRPL. XRDogverse was launched when meme coins and NFT was still in its infancy
- Team
  - Team understands the opportunity available in the NFT space and how it can create synergy
  - Team is hiring experts in XRP
  - Team is hiring NFT artists
  - Team is hiring a marketing team
- XRP
  - XRPL cannot be altered, time stamp can be confirmed
  - Black holed account is visible, and can be confirmed
- Community
  - All XR meme coin tokens related to XRDogverse
  - XRP community wishes to use XRPL
- Security
  - Black hole account

# WEAKNESS

- The original team are new to the space
- Difficult to burn tokens, as they have been airdropped
- The first time a community is being created that will be used to interact with other meme communities in the XRPL

A large, stylized, black and white graphic of the letter 'C' is positioned on the left side of the slide. It is composed of two thick, curved segments that meet at the top and bottom, creating a central white space.

# OPPORTUNITY

- Is possible to create different types of NFTs:
  - Images
  - Animated images
  - Comics
  - Music
  - Short film
  - Game items
- Built on the XRPL. New innovations of XRPL are being implemented consistently

A large, stylized white letter 'T' is positioned on the left side of the slide. The 'T' is set against a black background that forms a semi-circle on the left edge of the slide. The top bar of the 'T' is horizontal and extends to the right, while the stem is vertical and extends downwards.

# THREATS

- Bear market
  - When a bear market occurs interest in all things crypto decreases
- XRP NFT space is still in its infancy
- Competition
  - Other meme coins, NFT projects and Metaverse projects in the XRPL space

# FREQUENTLY ASKED QUESTIONS

- **How can we trust you?**
  - Account has been black holed.
- **Will it ever be worth 1000 dollars?**
  - Only 21, 000, 000 supply.
  - Bitcoin has same supply and despite being released a decade ago, as of year 2021 has reached over 50 thousand dollars.
- **What if we do not like the NFTs created**
  - The team we hire will be working alongside the community.
